-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: ____.

Objected Informalities

The disclosure is objected to because of the following informalities:

In The Claims

Claim 6, line 4, "toward the specimen beam" should be deleted.

Appropriate correction is required.

Rejection Under 35 U.S.C. 112, Second Paragraph

Claims 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the output" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 is also indefinite for reciting "the output" in line 11. What is the element that have the output?

Rejection Under 35 U.S.C. 102(b)

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yajima et al. (5,936,244).

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinada et al. (6,172,363).

Shinada et al. (6,172,363) disclose, in figs. 1-17, a scanning electron microscope apparatus. The apparatus includes an electron source 10 for providing an electron beam 19; a focusing lens 12 for focusing the electron beam 19; deflectors 13 and 15 for scanning the focused electron beam 19 on a sample 9; a deflector 18 for deflecting secondary electrons emitted from the sample 9; a detector 20 which is a micro channel plate (MCP or a secondary electron multiplier) for detecting the secondary electrons; a variable negative voltage source 36 for applying a variable negative voltage to the sample 9; and means for controlling the variable negative voltage according to an image contrast outputted by the detector 20 at a maximum value (see col. 7, lines 33-46 and col. 17, lines 42-52).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Iwabuchi et al. and Nishimura disclose a scanning electron microscope apparatus having a variable negative voltage source for applying the negative voltage to a sample to control an image contrast.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet T. Nguyen whose telephone number is 571-272-2479. The examiner can normally be reached on Monday-Friday from 8.00 AM to 6.00 PM.
